

LIKED THAT FREE ISSUE?

Here's the other 44.

That toolbox guide you just read? It's one issue out of forty-five. Eleven years of off-grid reporting. Every issue I've ever published. One download.

You just finished **The Off-Grid Toolbox**. Fifty tools. The spares cabinet. The consumables. The workshop. The buyer's guide.

That's **one issue**. I've published **forty-five of them** since 2014.

Solar systems. Water. Food storage. Critter proofing. Homestead repair. Shipping container builds. What NOT to do when going off-grid. Worst places to live off-grid. Surviving the collapse. Pursuit of happiness. Zombie apocalypse (yeah, that one's fun). Every one of them packed the same way that toolbox guide was — real, specific, no fluff, no filler, written for people who can't just run to the store.

Most of them are **\$9.99 each**. If you bought just five back issues at that price, you'd already be past what the whole library costs right now.
